

## 2021 Annual Report

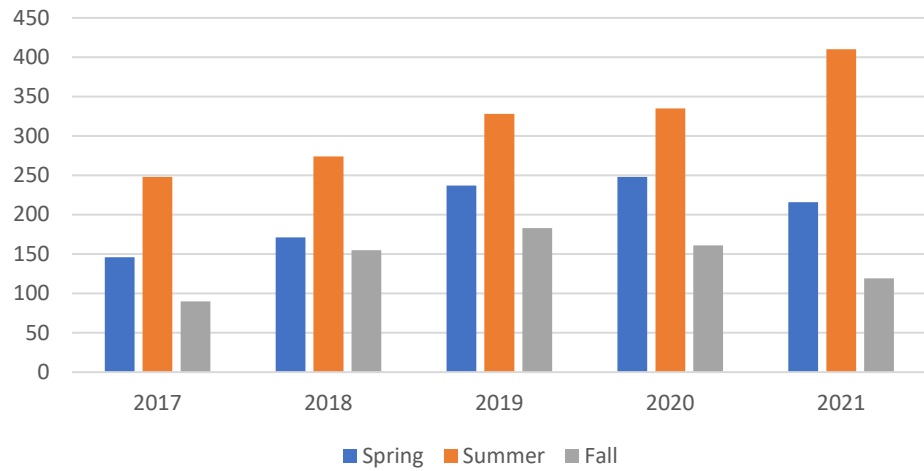

NBCSN has seen the exam candidate and recertification applications in 2021 continue to stay relatively flat. This was a successful year considering the impact of the pandemic on school nurses. Overall, revenue increased by 16.0%

The NBCSN board continued to meet virtually in 2021. This allowed the board to reallocate funds for the in-person board meetings to other exam development projects.

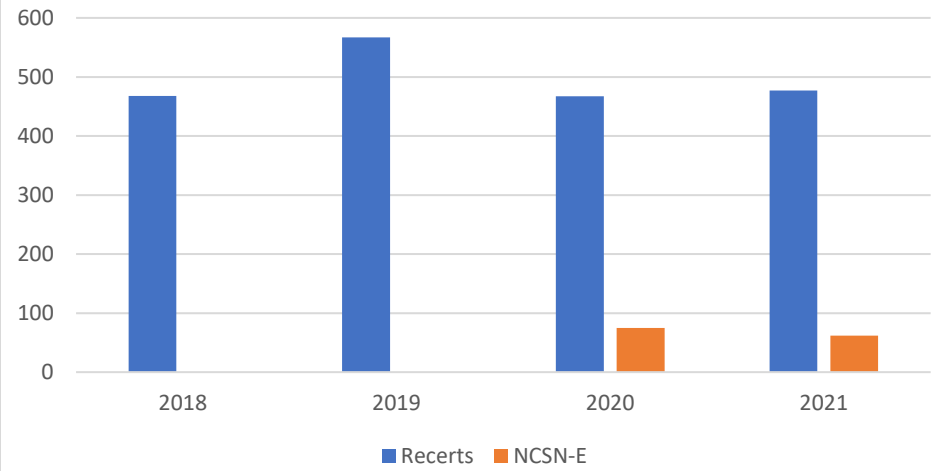

The overall pass rate for 2021 was 73%. The spring and summer exams were in line with the pass rate; however, there was a drop in the pass rate for the fall 2021 exam. The number of candidates for the exam also dropped 26% when compared to the previous year. There was also a lot of work placed on school nurses in the fall of 2021 between contract tracing, COVID protocols, and vaccinations becoming available for all school age groups.
